Start by checking the casting number which is situated at the left hand lower rear of the block. This number always ends in 6015 which is Ford Motor Co's part number for cylinder blocks. It's the numbers and suffix letter preceding this number which are important, provided they are CAST IN as part of the block.

## **Lotus / Ford Blocks**

There's a movement right now for fitting the right engine in the right car — a Mk1 Cortina with a Pre-Crossflow or indeed a 105E Anglia with the same, and there are plenty more examples, too... But with these '60s Fords it always has been the logical step to go straight for a bigger capacity unit like the Crossflow — they're 1600cc for starters and they virtually bolt straight in.

about as large as you can go at 85.4mm safely verses 87 without. If you do the math,  $98\text{mm} - 85.4\text{mm} = 12.6\text{mm}$ , now take away the cross feed drilling at 8mm and you are left with 4.6mm divided by 2 or 2.3 mm or around .090 inch which is getting a little thin if it is drilled perfectly ...

### **pre crossflow blocks 1500 - Cortina MK1 forum**

These engines were offered in the Ford Falcon XC in Australia. Whereas the previous integral "log head" I-6 motor borrowed from the Ford FE engine family design, the new crossflow motor borrowed from the Ford 351 Cleveland engine family. A common upgrade for a crossflow head engine is to use 351 Cleveland roller tip rocker arms.
