IEC 60085:2007 now distinguishes between thermal classes for electrical insulation systems and electrical insulating materials. It establishes the criteria for evaluating the thermal endurance of either electrical insulating materials (EIM) or electrical insulation systems (EIS). It also establishes the procedure for assigning thermal classes.

BS EN 60085:2008 - Electrical insulation. Thermal ...

The electrical insulation system for wires used in generators, electric motors, transformers, and other wire-wound electrical components is divided into different classes by temperature and temperature rise. The electrical insulation system is sometimes referred to as insulation class or thermal classification. The different classes are defined by NEMA, Underwriters Laboratories (UL), and IEC ...

Insulation system - Wikipedia

The thermal insulation system is classified by a single letter (IEC60085). Depending on the thermal class, the winding overtemperature, which is the difference between their temperature and ambient temperature, has the maximum limit given in the table; the resistance variation method is used to measure the
