THE FLYWHEEL-18- The moment of inertia, I , is determined by imagining that the body is divided into a number of infinitesimal elements of mass δm_i each at a distance r_i from the axis of rotation. The moment of inertia I about this axis is given by the sum of all the products ($\delta m_i r_i^2$) calculated for each element, $I = \sum_i (\delta m_i r_i^2)$. If the body has a simple geometrical figure, e.g. a ...

Electromagnetic or magnetic induction is the production of an electromotive force (i.e., voltage) across an electrical conductor in a changing magnetic field.. Michael Faraday is generally credited with the discovery of induction in 1831, and James Clerk Maxwell mathematically described it as Faraday's law of induction. Lenz's law describes the direction of the induced field.
