VoIP stands for Voice over Internet Protocol. It is also referred to as IP Telephony, Internet Telephony, and Internet Calling. It is an alternative way of making phone calls that can be very cheap or completely free. The 'phone' part is not always present anymore, as you can communicate without a telephone set.

An Introduction to Voice Over IP (VoIP)

A subnet mask neither works as an IP address nor does it exist independently of IP addresses. Instead, subnet masks accompany an IP address, and the two values work together. Applying the subnet mask to an IP address splits the address into two parts, an extended network address and a host address.

IP Tutorial: Subnet Mask and Subnetting

Many older IP phone models are not able to keep up with security and compliance standards. However, the latest Cisco IP phones reduce regulatory compliance risks and provide the latest technology with the option to be on-premises or cloud.
