For example, today I found out that water isn't actually completely colourless. If you asked me yesterday, I would have been sure that water - like air - only appears to be blue because of variable light refraction. But apparently it's blue because even clean water preferentially absorbs red light.

Dumbing of Age - Inside

Research shows that mild to moderate intensity aerobic exercise (for example, walking or jogging for 10-30 minutes) three to five days per week is enough to produce significant improvements in blood sugar control. | Aerobic exercise (think anything that raises your heart rate) can be achieved through activities such as walking, running ...
