Fly-by-wire (FBW) is a system that replaces the conventional manual flight controls of an aircraft with an electronic interface. The movements of flight controls are converted to electronic signals transmitted by wires, and flight control computers determine how to move the actuators at each control surface to provide the ordered response. It can use mechanical flight control backup systems ...

On all Airbus the information goes to the computer and then to the surfaces. After engine start, you set manually the TO C.G. % using the trim units, applicable for the A330-200/-300 and the old A340. On the new A330F (Freighter) and A340-500/-600, this is automatically done by the computer using the information that the pilot inserts via FMS.

Ok, here goes a long one about the 767. The first flight deck I ever sat in. (I may or may not have told this story as a reply to some post before). It was the year 2000 right before the attack on the towers. My family and I happened to be living in Chile temporarily because of my father's job (We're from Spain). I was 19

The training is expensive and time-consuming, but not that expensive or that time-consuming, if we compare to e.g. medicine or science. There is a low-paid and debt-heavy portion of the career. However, Medical students aren't paid and even the lowest-paid pilot is making more than the average phd candidate.
