A license key should be useable on only one computer (or at least you should be able to control this very tightly) A license key should be short and easy to type or dictate over the phone. You don't want every customer calling the technical support because they don't understand if the key contains a "I" or a "1".

How to generate and validate a software license key?

Clever Hans (German: der Kluge Hans; fl. 1907) was a horse that was claimed to have performed arithmetic and other intellectual tasks. After a formal investigation in 1907, psychologist Oskar Pfungst demonstrated that the horse was not actually performing these mental tasks, but was watching the reactions of his trainer. He discovered this artifact in the research methodology, wherein the ...

Clever Hans - Wikipedia

@StephenHolt I'm fairly certain every terminal-based password input I've ever encountered chose to echo nothing to the terminal. Given the security benefits and the fact that this is a well-known convention in the Unix world, I personally think echoing nothing is the right choice, unless you believe your user base is likely to be unfamiliar with the use of terminals (in which case it's ...
