Untangling Numbers From The
Telling the Truth About Damned Lies and Statistics By JOEL BEST The dissertation prospectus began by quoting a statistic -- a "grabber" meant to capture the reader's attention. The graduate student who wrote this prospectus undoubtedly wanted to seem scholarly to the professors who would read it; they would be supervising the proposed research.

Telling the Truth About Damned Lies and Statistics

Joel Best's *Damned Lies and Statistics* is a level-headed look at the problem of the use (mostly misuse) of statistics in America. He observes that "bad statistics are potentially important: they can be used to stir up public outrage or fear; they can distort our understanding of our world; and they can lead us to make poor policy choices."

More Damned Lies and Statistics encourages all of us to think in a more sophisticated and skeptical manner about how statistics are used to promote causes, create fear, and advance particular points of view. Best identifies different sorts of numbers that shape how we think about public issues: missing numbers are relevant but overlooked; confusing numbers bewilder when they should inform; scary numbers play to our fears about the present and the future.

Damned Lies and Statistics (Audiobook) by Joel Best ...

My title, Damned Lies and Statistics, comes from a famous aphorism (usually attributed to Mark Twain or Benjamin Disraeli): "There are lies, damned lies, and statistics."² There is even a useful little book, still in print after more than forty years, called How to Lie with Statistics. [Note 3] Statistics,
