Engines - clarkefire.com

With innovative engineering practices, best-in-class manufacturing processes, and comprehensive testing procedures which meet a wide range of regulations, Clarke Fire builds reliable fire pump engines that adhere to the highest global standards including Underwriters Laboratory (UL), Factory Mutual (FM), APSAD, VDS, and other country code applications.

Worldwide Advantage with Clarke | Clarke Worldwide

Clarke Fire Protection Products sold its first diesel fire pump driver in 1964 as a regional distributor for GM Diesel. We began manufacturing our own UL/FM driver in 1980 and now market the largest line diesel fire pump drivers in the world. To date, there are more than 100,000 engines bearing the Clarke name have been sold internationally.

About Clarke

speeds, these Clarke engines can be applied to fire pumps at any intermediate speed between 2800 to 3600 RPM. To determine the applicable intermediate certified power, make a linear interpolation of the Clarke FM-UL certified power curve. Contact Clarke or your Pump OEM representative to obtain details. CERTIFIED POWER AT ANY SPEED CLARKE

CLARKE FIRE PUMP DRIVERS

Each engine is dynamometer tested for a minimum of four (4) hours to assure operational integrity and performance. Instead of costly replacement options, we can remanufacture your existing diesel engine for a fraction of replacement cost. Engine Models for Clarke Fire Pumps Include: John Deere Models 4045, 6068, 6081, 6090, 6125, and 6135.
