Here, we will review the two (H&E, Toluidine blue) common staining methods used during a frozen section, compare their advantages and limitations, and outline best lab practices in achieving optimal staining result. H&E. H&E is the most commonly used of all the various staining methods available in frozen section.

Staining Methods in Frozen Section: Best Lab Practices

The same principles and methods can be used in different coding situations (eg, gastroenterology, gynecology, urology, etc). This article only touches on the specimen's main CPT code. If the main code is incorrectly chosen, modifiers and other coding techniques (the realm of billing managers) cannot help.

Pathology is the study of the causes and effects of disease or injury. The word pathology also refers to the study of disease in general, incorporating a wide range of biology research fields and medical practices. However, when used in the context of modern medical treatment, the term is often used in a narrower fashion to refer to processes and tests which fall within the contemporary medical ...
