Background: An ongoing outbreak of coronavirus disease 2019 (COVID-19) has spread around the world. It is debatable whether asymptomatic COVID-19 virus carriers are contagious. We report here a case of the asymptomatic patient and present clinical characteristics of 455 contacts, which aims to study the infectivity of asymptomatic carriers.

Background: The recent economic recession has been associated with short-term increases in suicide in many countries. Data are lacking on the longer-term effect on suicide and on the impact on non-fatal suicidal behaviour. Methods: Using interrupted time series analyses, we have assessed the impact of economic recession and austerity in Ireland on national rates of suicide mortality and self ...

The role of advocacy in public health. Difficult questions face health researchers and practitioners when it comes to the boundaries between their professional, personal and political activities. 1,2 This is an increasingly important dilemma, given the growing interest and demand for 'public health advocacy'; a recent publication, for example, argued that 'Shying away from advocacy is ...
