Though previously this page held a massive table of cranial nerve information "to simplify revision", it has been re-dedicated to the clinical examination of the cranial nerves. It therefore presents a summary of the steps taken to perform a thorough cranial nerve exam, and has greatest bearing for the hot cases of the CICM fellowship. In the SAQs one also frequently finds gaze palsies and ...

Author information: (1)Department of Neurology, Mayo Clinic, Phoenix, Arizona, U.S.A. The clinical examination of the trigeminal and facial nerves provides significant diagnostic value, especially in the localization of lesions in disorders affecting the central and/or peripheral nervous system. The electrodiagnostic evaluation of these nerves and their pathways adds further accuracy and reliability to the diagnostic investigation and the localization process, especially when different testing ...
