Super B Rebuild. A Super B rebuild includes carb removal and disassembly, cleaning, checking for play in the throttle plates, changing the jets, and reassembling. No special tools are needed, but time and patience are required. S&S Cycle makes a master rebuild kit for the Super B, part 11-2914.

Super B Rebuild - Classic Motorcycle Build

The idle mixture screw should be adjusted somewhere between 3/4 and 1 1/4 turn out from the bottom. If it is out of this range, the carb is not jetted correctly. Through experience over the years I've found that the Super B used on a Big Twin Harley should be jetted 29.5 on the slow jet with a 70 or 72 on the main jet.

S&S Carburetor Jetting Guide. These are the jetting recommendations for S&S carburetors for various engine sizes. The jetting in your carburetor should fall within the ranges indicated within the chart. Super A, Super B (1 7/8")

S&S Carburetor Jetting Guide - Nightrider.com

Thunderjet™ is a jet-able, externally mounted third fuel circuit that improves the performance of 2-circuit carbs such as the S&S Super. Unmodified, these carbs typically have a low speed, or intermediate, circuit that supplies fuel from idle to approximately 2500 rpm, at which point the carbs' main jet circuit becomes active, delivering more fuel to the engine. These two circuits must ...

Thunderjets™ for S&S® E/B Carburetors

I can't get my super b carb to run right. It's cold today, maybe 40's out. What ritual should I follow to get this thing to start consistently. I just choked it and it started after a few tries, idled for a minute, then quit. Now it won't start weather choked or not. A guy I know says "pull it off and throw it in the Mississippi, it's junk".
