Shifting Graphs Up/Down/Left/Right - Tree of Math

Here are some simple things we can do to move or scale it on the graph: We can move it up or down by adding a constant to the y-value: $g(x) = x^2 + C$. Note: to move the line down, we use a negative value for C. $C > 0$ moves it up; $C < 0$ moves it down We can move it left or right by adding a constant to the x-value: $g(x) = (x+C)^2$

Function Transformations - Math is Fun

Translate x units to the left or the right or three units up or down. You'll sometimes see it like this, but just recognize this is just saying just take your x and subtract five from it, which means move five to the left. And this just means take your y coordinate and add three to it, which means move three up.
