How to Calculate Molality of a Solution . Molality is used to express the concentration of a solution when you are performing experiments that involve temperature changes or are working with colligative properties. Note that with aqueous solutions at room temperature, the density of water is approximately 1 kg/L, so M and m are nearly the same.

How to Calculate Concentration of a Chemical Solution

Solutions Based on Percentage Determine if the percent solution is given as w/v or v/v. Solutions that are based on w/v measurements are generally a solid chemical dissolved into a liquid solvent such as water. Solutions based on v/v measurements are liquid diluted into a liquid.
